

The MHRA recommends that an unlicensed medicine should only be used when a patient has special requirements that cannot be met by use of a licensed medicine. Please note that any change or advice based on this information should be based on a medication review to ensure clinical appropriateness of therapy.  
Please note that advice on options is considered to be correct at time of writing but may be subject to change.

A	**GGC DERMATOLOGY SPECIALS	SCOTTISH DRUG TARIFF PART 7S JAN 18		SCOTTISH DRUG TARIFF PART 7U JAN 18
Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
Acetylcysteine Eye Drops Preservative Free	LICENSED Ilube® 5% eye drops are available - but contain preservative.		Unlicensed Special Eye Drops	5% included in Part 7S of Scottish Drug Tariff

Buccal midazolam is available as licensed Buccolam® products or as licensed and unlicensed Epistatus® products. GGC Formulary note - Restricted to specialist initiation in GGC Formulary. The two preparations are different strengths and may have different doses, therefore are not considered interchangeable. In light of these differences and the associated risks, any agreed change of preparation in existing patients would require careful management by all involved.  <b>Caution**</b> The translucent tip-cap of BUCCOLAM prefilled syringes can on occasion remain attached to the syringe tip when pulling off the red cap with the risk of being detached into the patients mouth and inhaled or ingested upon administration. If the tip-cap remains on the syringe, it needs to be removed manually before administration.
<b>Midazolam (liquid)</b>			Unlicensed 1mg/ml and 2.5mg/ml liquid available	
<b>Midodrine</b>	LICENSED Midodrine (Bramox®) 2.5mg and 5mg tablets available	If swallowing difficulties, the tablets can be crushed and mixed with water.	Unlicensed midodrine tablets available.	
<b>Mirtazapine</b>	LICENSED preparations available (solution and orodispersible tablets)	Standard tablets can be crushed and mixed with water for administration via enteral tubes. May not fully dissolve so flush tube well with water. For swallowing difficulties, use orodispersible tablets or liquid as crushed tablets have a bitter taste and anaesthetic effect on the mouth. See NEWT guidelines for more information.	Unlikely to need: licensed products available	
<b>Modafinil</b>		Crush tablets and mix with water. Give immediately.	Unlicensed oral suspension available	Note - restricted to specialist initiation in GGC Formulary.
<b>Morphine</b>	LICENSED preparations available (solution, sachets and suppositories)	Morphine sulphate MR capsules (Zomorph): Capsules can be opened and the contents sprinkled on to food e.g. yoghurt or jam, but DO NOT crush contents - see NEWT guidelines for info	Unlikely to need: licensed products available	
<b>Multivitamin</b>				Multivitamin One-A-Day tablets included in Part 7U of Scottish Drug Tariff

SCOTTISH DRUG TARIFF PART 7U JAN 2018

Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
Odaban				Odaban 20% included in Part 7U of Scottish Drug Tariff
Oilatum				Oilatum Bath Formula and Oilatum Scalp Intensive Shampoo included in Part 7U of Scottish Drug Tariff
Olanzapine	LICENSED orodispersible tablets available. Can be placed on the tongue or dispersed in water, orange juice, apple juice, milk or coffee. Olanzapine may be irritant to the skin and eyes, so take precautions to avoid contact (e.g. wear gloves).		Unlicensed 2.5mg/5ml special oral liquid available	Note - restricted to specialist initiation in GGC Formulary.
Omeprazole	LICENSED orodispersible tablets available (Losec MUPS®). Disperse in water then mix with orange/apple/pineapple juice, apple sauce or yoghurt if flavouring required. Alternatively, consider switching to licensed lansoprazole orodispersible tablets (Zoton FasTabs®). For enteral tube administration, consider switching to lansoprazole as Zoton FasTabs® as licensed for naso-gastric tube administration. See NEWT guidelines for more information. Omeprazole orodispersible tablets - GGC Formulary states: Restrictions: Only for use in patients with narrow-bore feeding tubes.		Liquid special suspensions of various strengths available.	Omeprazole orodispersible tablets - GGC Formulary states: Restrictions: Only for use in patients with narrow-bore feeding tubes.  Prescribing Notes: GGC Paediatrics use Omeprazole Orodispersible Tablets for oral administration, and use Omeprazole Capsules (Gastro-Resistant), contents of the capsules suspended in Sodium Bicarbonate Oral Solution, Sugar Free 1 mmol/ml, for tube administration.  The orodispersible preparations are considerably more expensive than omeprazole capsules and should not used unless necessary.
OroNac				OroNac 600 Caps, OroNac 600 Tabs, and OroNac 600 Effervescent Tabs included in Part 7U of Scottish Drug Tariff
Oxybutynin	LICENSED sugar-free liquids available - please ask prescriber to specify 'sugar-free' to ensure licensed product. ## Specials Contact Numbers

### NHS GGC Central Prescribing Team

Community pharmacists should telephone 0141 232 1777 for advice or authorisation.

Authorisation is not required if:

- The product is listed in Part 7S of the Scottish Drug Tariff.
- The product can be sourced from NHS manufacturing units in Scotland, England or Wales.
- Previous authorisation has been obtained in the last 12 months and, the patient, the GP practice, the product, the supplier and the cost are all unchanged. Re-authorisation is required if the price increases by > 20% (or if anything else changes in the prescription).

GPs should contact their local community pharmacist or local Prescribing Support Team for advice.
